INDUSTRY EXPERIENCE

GODADDY, INDIA | SENIOR SOFTWARE ENGINEER (FTE)

2025- Present | Gurgaon, India

- Joined **Infosec** team to manage infrastructure tailored for efficiently gathering and processing extensive security logs.

MICROSOFT IDC | SOFTWARE ENGINEER (FTE)

2020 - 2024 | Hyderabad, India

- **Tech Stack** - C# | .Net | Java | Bash | Python | TypeScript | React | SQL/NoSQL | KQL | Microservices | Azure Cloud Services | Azure Devops | Docker | CICD
- Worked as a **lead for multiple projects** under **Assessments, Consulting and Engineering (ACE)** team guiding junior and vendor developers.
- Managed, refactored and cleaned up all the legacy projects under ACE to streamline engineering delivery. Saved more than **80%** manual engineering efforts and **cost saving of \$7000 /month to \$2300 /month** through **automation, monitoring and alerts**.
- Created and maintained multiple microservices for **scanning credentials in Source Code(20m+), ADO pipelines(10k+), ADO attachments(3m+)** which helps Microsoft to detect and remediate more than **3000+** credentials.
- Maintained and enhanced **Dynamic Web Scanning solution** to protect **1000+** Microsoft internal and user facing tools from external attacks.
- Created a **multi tenant bug filling, reporting tool** end-to-end(**Accessible UI, REST APIs, Backend**) for **MS Digital RED Team** to protect **MS Digital products and services**. This tool is now being use as the **primary in house product** for **pen-test customer's reporting and mitigation solution** across all other RED teams at Microsoft.
- Migrated old framework solution of **AZTS** to dotnet core was much **faster(12-16 hrs to 90mins)** and **cost effective(\$800 /day to \$150 /day)**. Added multiple core backend feature.
- Created an modular **Auto-Updater** service, now getting used in **3+ teams**.
- Created **2 hackathon projects**, now **fully adapted as core feature** in Microsoft internal product.

MICROSOFT IDC | SOFTWARE ENGINEER (INTERN)

May 2019 - July 2019 | Hyderabad, India

- Worked with **SIE-STE team** under **MS CSEO DSR** to develop a POC on Synthetic Transaction Platform(SSTP), which is a high scale autonomous system to perform secure transaction simulation to ensure control effectiveness of different services based on dynamic micro-service architecture.
